

Spartan

The Spartan is a battery /AC powered portable sound system with a 20 watt (RMS) amplifier. Its resilient 4" coaxial speaker produces exceptional projection with outstanding clarity. The Spartan features a 96 channel wireless receiver to accommodate a 96 channel wireless microphone; either a body-pack or handheld configuration. Additional features include: a USB port to read MP3 files for playback of recorded program material, a cabled microphone input, auxiliary line input, tone control and external speaker output.

Portable 20-watt amplifier with wireless receiver

The Spartan is ideally suited for voice reinforcement in a classroom, conference center, or covering an assembled crowd outdoor. Whether permanently mounted or used on the go, the Spartan will give full performance, either plugged into AC power or by its internal batteries.

Spartan
